DW 400

The fully-automated orbital stretch wrapper/wrapping machine is designed and engineered for heavy loads that need a strong wrap force like door, motor, profile, wooden panel. With 2 films for faster and better pack.

DW 700

With a strong ring and 2 films, PLC & touch screen closed in control box for better protecting, two gravity conveyor or durable motor conveyor system. PLC controlling all parameters from machine. Indicators for any troubleshooting and photo-eyed monitoring system. Practical and easy to control film tension with constant tension. It has automatic film cutting and feeding where the width of film can be adjusted. For packaging of large products, a film storage box is also available.

DW 900 / 1200

Ease and safety feeding and taking out of film roll. Machine is under safety mod when changing the films. Automatic pneumatic control of cutting film and automatic start. Speed of ring is adjustable by inverters. 1 Speed of conveyor is adjustable. Object outer packing diameter: **400-400mm, 700x700mm 900x900mm, max 1200x1200mm**
Ring speed: **10-60 r/min**
